

Hourly Cost:16 (€)

Delivery Days:11 Working Days

| # | TITLE | DESCRIPTION | XPORTSOFT COMMENTS | NOTES | Mean Hours | Mean Cost | Alessio notes |
|-----|-------------------------|---|--------------------|---|------------|-----------|--|
| | | | | | | 0 | |
| 6 | Sales process | | | | | 0 | |
| 6.1 | Options on product page | Each product has some "options" that we need to show the user on the product page in order to allow them for selection. Example product on "/prodotti/polvere-di-agrumi-40gr" | Need more details | https://www.screencast.com/t/xpFsSTEcER ---- https://www.screencast.com/t/1AebScgiEqaP | 9 | 144 | |
| | | When user click on any category , products in that category will be displayed. | | | | 0 | What does it means? Categories and options are completely different things |
| | | Need to design the option to have price variation on basis of small, medium, large | | | | 0 | There is nothing to design, options and eventual price/weight variations come directly from product record in the table "products" |
| | | | | | | 0 | |
| 6.2 | Product quickview modal | Implement the product quickview modal in every section where a product appear like home, products and widgets. Check video demo. | | https://www.screencast.com/t/5IDGDKiiOo | 8 | 128 | |
| | | Click on quick view button, a quick view popup for every product will be displayed | | | | 0 | Sure |
| | | > Click on any product its detail page will be displayed, from there also user can select the quantity and ass product into basket | | | | 0 | Users should be able to select options and add to cart the product just like from the product page |
| | | | | | | 0 | |

| | | | | | | | |
|-----|---------------|--|---|---|------|-----|---|
| 6.3 | Shopping cart | When the user click on "add to cart" then the product should fill the shopping cart found in "/shopping-cart" with the selected quantity (with edit function), options, subtotal, total and remove function. We added 3 hours as agreed during the 11/04 in Skype, for guest check-out, so it was 15,5 and now is 18,5 | | https://www.screencast.com/t/sJ0ABwtK | 18,5 | 296 | |
| | | All totals must be update on the fly if something is changed by the user. | | | | 0 | |
| | | This section also contain "Apply Coupon", you can check a coupon validity by looking at the database table "coupons". | | | | 0 | |
| | | Shopping cart should retain everything in cache so that the customer can retrieve the cart by closing and re-opening the browser (take into consideration the use of Redux module). | Expaind in document 27 feb queries latest | | | 0 | |
| | | > User Can delete the product from cart | | | | 0 | Yes, indeed |
| | | | | | | 0 | |
| 6.4 | Checkout page | Implement the checkout page using Stripe API for processing payments with credit cards and GSped API (check notes on bottom of this document) for shipping notes communications. This section should include everything shown in the template. | You can comment out tracking conditions section for the moment | https://www.screencast.com/t/zdXZUX4TcEpJ | 27,5 | 440 | |
| | | Checkout should be available for guest customers too by using Firebase Guest auth. After a successful sale the "/thank-you" page should appear. | Shipping Fee: List of available shipping methods retrieve from the database table "shipping_methods". Shipping methods must have "status" field on true and should be sorted by "sorting" field. Also, we must only show shipping methods which has the customer shipping country in their "geozone.countries" field. | | | 0 | |
| | | > Checkout as a guest(need to design page for this part) | 'additional service': You can comment out this section for the moment | | | 0 | Why? Everything was alread designed within the template |

| | | | | | | | |
|-----|----------------|---|---|---|----|------------|---|
| 6.5 | Thank you page | Implement this page after a successful sale with all the sharing tools properly set | On thank you page we don't have to show users ordernumber and order details for user. Only we have to show simple thakyou page? | https://www.screencast.com/t/D3iC1P7N2IU | 4 | 64 | We need this page, where is the quotation? (no data layer for the moment, just the page with sharing tools) |
